

PROPOSED BUS SERVICES FOR ROTHBURY AND COQUETDALE

news

FINANCE

Talks are still progressing with our financial backers. We are more than happy with the guidance and support we are receiving along with their enthusiasm towards our proposed services.

We are currently analysing the best options to support us through the setup process and as this progresses we will keep you updated.

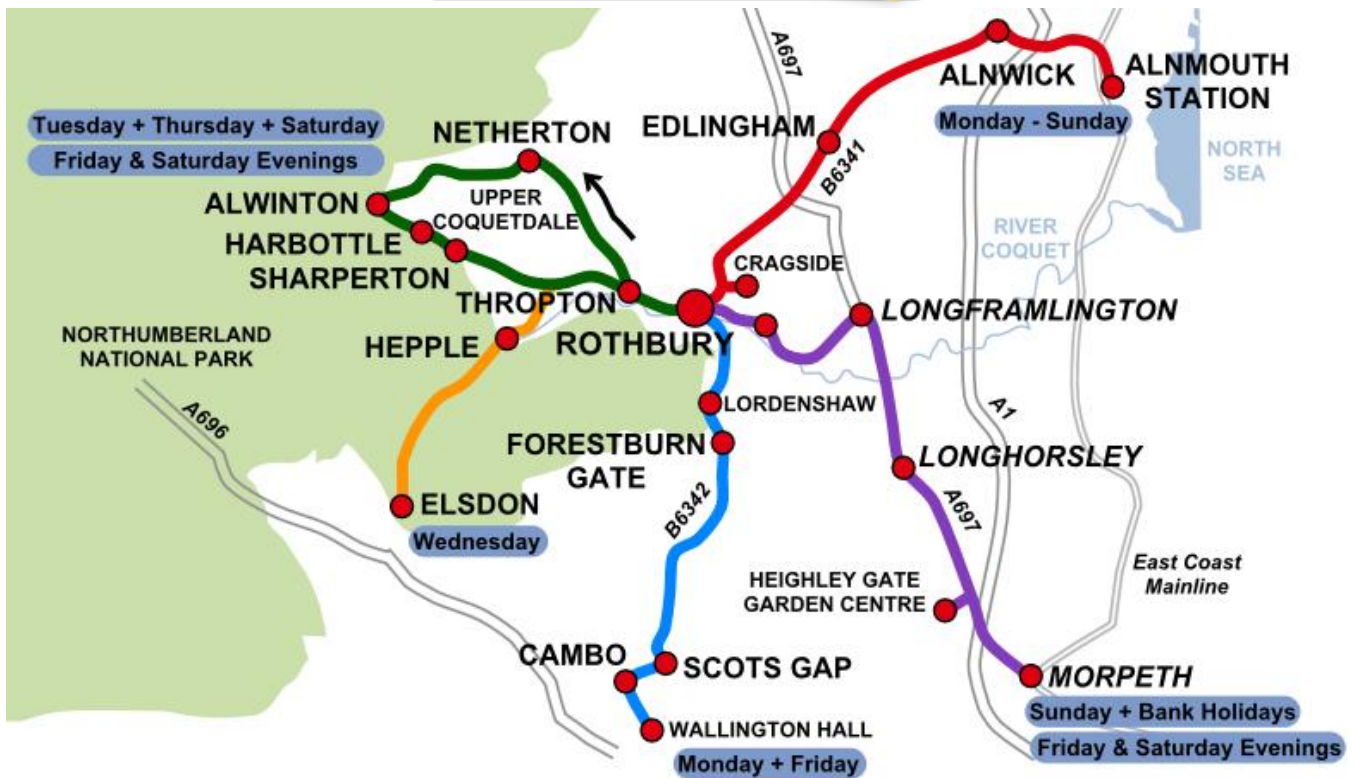

timetables

We aim to have our proposed timetables available for commenting on soon.

We have spent some time working out the best possible coverage and reliability based on our initial questionnaire feedback.

Ensuring a reliable and efficient timetable is one of our main priorities based on when people have said they wish to travel. Keeping costs down while keeping a high standard for both us and passengers is another aim.

proposed routes

Our Latest Proposed Network Map...

We have devised this latest network to encourage higher passenger numbers on all routes.

This will help sustain areas that may be less frequently travelled but are still necessary to operate in.

All three (**GREEN, YELLOW & BLUE**) routes have been designed to connect with our Alnwick service.

They will also allow passengers to transfer onto existing daytime services to Morpeth.

You can provide feedback using the links below or filling in a comments slip available inside.
